

CLAIM LISTING

1 1. (Currently Amended) A fire smoke cleansing device for personal use and comprising a
2 particle filter, carbon monoxide filter and a filter for acidic gases, [~~characterized in that~~] wherein
3 it comprises a rectangular oblong house [(1)], which in one end comprises a number of inlet
4 openings [(3)] arranged over an end surface [(2)] for a gaseous medium, in connection to the
5 inlet openings [(3)] a filter space [(5)] is arranged containing in the order given from the inlet
6 openings a) a particle filter [(21)], b) a catalyst [(22)] for the oxidation of carbon monoxide to
7 carbon dioxide to eliminate carbon monoxide present in said gaseous medium, and c) a filter
8 mass [(23)] for elimination of acidic gases, in connection to the filter space [(5)] a valve chamber
9 [(6)] is arranged comprising two one-way valves [(9, 13)] to provide a controlled flow of gas
10 through said filter space and a bite mouth piece [(11)] arranged to the valve chamber [(6)] at the
11 opposite end [(10)] of the house for providing ventilation.

1 2. (Currently Amended) A fire smoke cleansing device according to claim 1, wherein the valve
2 space [(5)] comprises an opening [(8)] provided with a first one-way valve [(9)] arranged to the
3 filter space, whereby this first one-way valve controls the transport of gas from the inlet openings
4 to the bite mouth piece [(11)], and an outlet opening [(12)] having a second one-way valve [(13)]
5 for outgoing respiration air, whereby said second one-way valve prevents respiration through the
6 outlet opening.

1 3. (Currently Amended) A fire smoke cleansing device according to claim 1 [~~or 2~~], wherein a
2 distribution space is arranged between the inlet opening of the house.

1 4. (Currently Amended) A fire smoke cleansing device according to claim 1, wherein the
2 catalyst for the oxidation of carbon monoxide is a mixed valence oxide.

1 5. (Currently Amended) A fire smoke cleansing device according to claim 4, wherein the
2 catalyst is a cupper oxide/manganese oxide.

1 6. (Currently Amended) A fire smoke cleansing device according to [~~claims 1-5~~] claim 1,
2 wherein a sound producing means is connected to the valve chamber and is arranged to provide a
3 sound at exhaustion through the valve chamber.

1 7. (Currently Amended) A fire smoke cleansing device according to [~~one or more of claims 1-6~~]
2 claim 1, wherein the house is provided with a fluorescent dye.

1 8. (Currently Amended) A tightly closing package containing a fire smoke cleansing device
2 according to [~~one or more of claims 1-7~~] claim 1, as well as moreover further protection
3 equipment to fire smoke influence.

1 9. (Currently Amended) A package according to claim 8, wherein it further contains a drying
2 agent.
